

# POWERFUL PRECISION

DesBio's Homeopathic Approach to Relieving  
the Symptoms of Chronic Infection

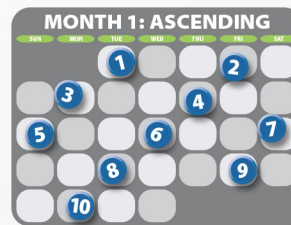

Chronic infections are often a hidden source of unexplained symptoms and diseases. DesBio's *Series Symptom Relief Kits* offer a uniquely powerful and precise homeopathic approach to relieving the symptoms of chronic infection that can't be matched.

A kit contains ten vials, each with a different safe and effective dilution of the actual deactivated virus or bacteria the kit is intended to address. The vials are taken in *series*, first **increasing** in potency for the first 30 days of the protocol, then **decreasing** in potency for the second 30 days to provide a full 60 days of symptom relief.

The basic 60-Day *Series Protocol* requires two **ten-vial kits**. Each vial is taken all at once, with the contents held under the tongue for 30 seconds. The **first kit** is taken over a 30-day period, one vial every three days, in **ascending** order (from #1 to #10). The **second kit** is then taken over 30 days (one vial every three days) in **descending** order (from vial #10 to vial #1).

This ascending and descending sequence provides the most comprehensive and powerful homeopathic approach available to relieving the symptoms of chronic and acute infections.

## Available Series Kits include:
