

## Series Therapy and Comprehensive Homeopathic Therapy

*Bruce H. Shelton, MD, MD (H), DiHom, FBIH, Homeopathic Family Physician, Phoenix, Arizona*

Chronic infections are often a hidden source of unexplained symptoms and diseases. Series Therapy Kits build on the same principles as allergy desensitization, providing the immune system with a template for passive homeopathic allergy protection. Vials are taken in series (thus the name “series therapy”), increasing in potency to up-regulate and fortify the immune system, then decreasing to support the body’s residual passive protection. Follow the instructions below carefully for best results. Patients who do not follow the instructions carefully, particularly those who use the second series kit from 1-10 rather than in reverse order (10-1), risk making symptoms worse rather than better.

After the immune system is attacked by an infectious disease, antibiotics have minimal effect. Despite this, infectious disease doctors treat these diseases with as much as a five-part antibiotic cocktail administered orally and parenterally for up to several years running. These doctors claim good results. But it is the final phase where integrative medicine claims its best results and differs greatly from its allopathic counterpart treatment of massive administration of antibiotics.

Integrative treatment is based on detoxing environmental toxins and then recovering the immune system. Treatment steps are as follows. Desbio has additional extensive training for qualified practitioners.

### Core Protocol

- 1) Treat the patient with **Smart Silver\*** in sufficient oral dosing based on size of the patient. This helps kill the germs as they are released from bio-slime layers that coat blood vessels and mucous membranes. Usual dose is two teaspoons twice daily throughout treatment
- 2) Start the patient on **OmniCleanse Comprehensive Homeopathic Detox Kit\*** Basic 6 Part Comprehensive Homeopathic Detox:
  - a. **Cerebromax+Spinalmax+Matrix Support\***: Thirty drops each added to every liter of water consumed by the patient (1-2 liters a day for children and 2-4 liters a day for adults) on

Friday, Saturday and Sunday

- b. **Detox I+ Detox II+ Detox III\***: Thirty drops each added to every liter of water consumed Monday through Thursday.

CONTINUE these drops for at least 6 months.

- c. **OmniCleanse Powder\***: 1 scoop per day mixed in beverage of choice

- d. **OmniCleanse Capsules\***: 1 cap per day. If experiencing symptoms of clearing reaction may increase to up to 3 caps per day.

CONTINUE for 8 weeks for best results.

- 3) Start patient on specific **DesBio Series Kit\***: Kit 1 vials 1-10 every third day for month one; Kit 2 vials 10-1 every third day for month two; the next 1M series Kit weekly for ten weeks; and finally the next 10M kit one vial weekly for ten weeks. It is very important to take the second kit in reverse order, from 10-1. Patients who take the second kit from 1-10 often worsen their symptoms.
- 4) Start patient on any available specific homeopathic detox drops. These may include **Lyme Plus, Candida Plus, EBV/CFS Plus\***, etc: Thirty drops each added to every liter of water consumed EVERY day of the week for at least 6 months

### Additional Considerations

If patient needs further support, consider the following:

- **Bio Gallium Phase** helps relieve the body of lingering toxic viral energy, and **Bio Co-Enzyme Phase** and **Bio Cytotox Phase** help promote restoration of aerobic metabolism.
- Add **Mineral+ Energy\*** (Energy Catalyst) drops as well throughout therapy: The Mercurious Corrosivus Content to Detox Mercury added to other chelators such as Zeolite, Chlorella or Oral EDTA will safely detox heavy metals without resorting to a DMPS IV product for mercury elimination.
- Put patient on **Equilib\*** to restore the brain and nervous system to balance and normal function as the nervous system has germs, antibodies, and heavy metals eliminated from the system. This also adds back needed minerals and other important nutrients that a patient requires. This very complete nutrient formula is geared to the needs of patients with compromised nervous systems.

- Consider adding **Homeopathic Chemtox\*** or **Addiclenz\*** to eliminate environmental chemicals, drugs, and pesticides from the delicate nervous system tissues to make detoxing complete.
- Consider using **Celeragesic\***, **Chronagesic\***, and/or **TriCuramin\*** for those patients who are experiencing pain.
- Use **OmniCleanse\*** Capsules and **OmniCleanse\*** Powdered Beverage if indicated.
- Use **Vitamin C Liposomal** in a dose sufficient for the patient's weight.
- Certain practitioners have access to laser therapies that help detox heavy metals when used in conjunction with the entire protocol

\*Co-infections are common. You may use more than one series kit at a time. Simply start Kit 1 on Day 1, then start Kit 2 on Day 2, ensuring that each dose of each kit is separated by three days.

This is a complete, well-thought-out protocol that safely treats patients without resorting to side-effect-laden antibiotic therapy.

DesBio Series kits are manufactured according to the HPUS of the United States. They are properly succussed and prepared according to the same procedures as all of DesBio's homeopathic products. No live pathogens are used in the manufacturing process and all of the products have an Ethanol base. The Series kits are individually assembled according to the dilutions that are specified for each of the homeopathic remedies.
